AI-Powered DevOps Job Matching Bot v1.0

1. Objective

Build an automated agent that finds English-speaking DevOps, SRE, Cloud and Platform Engineering jobs in Germany, scores each job against the user's CV using AI, and emails two curated reports daily.

2. Success Metrics

20+ qualified jobs/day, ATS score >80 for recommendations, duplicate rate below 2%, email delivered at 08:00 and 18:00 CET.

3. Target User

Senior DevOps Engineer with 8+ years experience in AWS, Kubernetes, Terraform, CI/CD and Observability seeking Berlin, Munich, Frankfurt or Remote roles.

4. Functional Requirements

Aggregate jobs from Greenhouse, Lever, Ashby, SmartRecruiters and company career pages; normalize data; extract salary, tech stack, remote policy and application URL; AI ATS scoring; HR email extraction where publicly available; HTML email; PDF report; GitHub Actions scheduler.

5. Non-Functional Requirements

Runtime under 10 minutes, modular parsers, Docker support, structured logging, retry logic and idempotent duplicate detection.

6. Architecture

GitHub Actions triggers Python scraper -> normalize -> AI matcher -> SQLite cache -> HTML/PDF generator -> Gmail SMTP.

7. ATS Scoring

AWS/Kubernetes 30, Terraform 20, CI/CD 15, Observability 15, Startup fit 10, English-only 10. Only scores >=80 included.

8. Tech Stack

Python 3.12, BeautifulSoup, Playwright, OpenAI API, SQLite, Jinja2, Gmail SMTP, Docker, GitHub Actions.

9. Repository Structure

app.py, parsers/, matcher.py, emailer.py, templates/, prompts/, database/,
.github/workflows/jobs.yml

10. MVP Roadmap

Week1: parsers + DB. Week2: AI matching + email. Week3: dashboard + Docker. Week4: production hardening and monitoring.
